

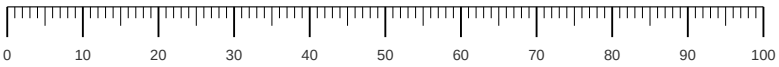
TOE



FitFinder insole template · a4-v1

1. Print on A4 at 100 % (“Actual size”). Never use “Fit to page”.

2. Check both rulers: each must measure exactly 100 mm.

3. Lay the paper flat. Place the insole along the diagonal, inside the grey dashed lines: heel towards the bottom-left, toes towards the top-right. Keep a little white paper all around it.

4. Photograph from straight above in even light. All 4 black squares must be visible. No shadows, no flash.

Keep the black squares clean, flat and uncovered.
